Negotiation Focus

Prioritize lease extension negotiations before closing and use the short lease and low revenue per square foot as leverage for further price concessions. Request full equipment maintenance records and age details. Use crime and competition risk to negotiate favorable insurance terms or seller warranties.

Business Strengths

Significant discount to industry revenue and SDE multiples enhances margin of safety for buyers.

Favorable demographic profile with high density, large renter base, and strong ethnic diversity supports robust ongoing demand.

Business Concerns

Very short remaining lease (3 years) poses immediate continuity risk and may limit financing options.

Intense local competition and high fixed costs (notably rent at \$4,000/month) pressure margins and require operational improvements.
